

Brad and Dan can't get their jobs done but never miss other children's athletic events.

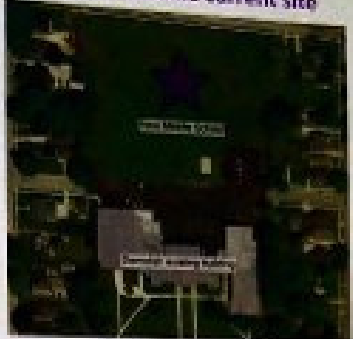

**So Riddle me this Batman:
WHAT IS THE REAL
REASON they want taxpayers
to drown in debt and buy them
a \$67,000,000 addition onto the
high school?**

Options to build the new school.

Option 1: Attached to the high school

Option 2: At the current site

The focus group recommends Option 1. Building the middle school attached to the high school:

- Provides middle school students with access to advanced courses, career and tech ed classrooms, family and consumer science labs, and athletic facilities.
- Provides more gym space (a 3-court varsity gym as compared to a 2-court gym in Option 2). The larger gym could be used by the high school for tournament games and WIAA events.
- Maintains the existing middle school building for future sale or reuse. Option 2 would require demolishing the existing building to provide needed practice fields and green space.
- Has space for future building expansion if needed, while Option 2 does not.
- Has a lower total cost.

Wake up Kiel!
